Cannabinoid analyse %
THC 0,01
THCA 0
CBD 9,69
CBDA 0,92
CBN 0
THCV 0
CBG 0,14
CBC 0

Micrological screening

Not tested

The sample

Gives a full spectrum of cannabinoids

As a consequence, the entourage effect is well present.

Is anti-inflammatory and inhibits the growth of malignant cells.

Continue to show very little chlorophyll.

Can be decarboxylated longer.

As a result, more THCA and CBDA will be transformed.

For maintenance use (stay healthy) that sample is very suitable.

Sincerely

Artie de Lange
